

Delivery Manager

Step 1- Log in to **Back Office** with your user credentials. .

Step 2- Open **Delivery Manager** from home page or navigating **System Tools** (see picture below)

Step 3- You will see a **Delivery Manager** page like this having five tabs (see picture below)

A screenshot of the 'Delivery Manager' web application interface. At the top is a green header bar with the text 'Delivery Manager'. Below the header is a navigation bar with five tabs: 'Delivery Summary' (highlighted), 'Quick Trip Sheet', 'Remove From Trip Sheet', 'Add To Trip Sheet', and 'Trip Sheet Messages'. The main content area contains a search form with 'From Date' and 'To Date' fields set to '10/22/2013', a 'Search' button, and a 'Update Selected Order to Not Delivered' button. Below the search form are radio buttons for 'All Orders', 'Routed Orders', and 'Not Routed Orders'. At the bottom, there is a 'Preview Trip Sheet' button and three buttons: 'Load Trip to Garmin', 'Generate Trip Sheet', and 'Confirm Delivery'.

Here you can create new trip sheets, manage trip sheets, print and preview trip sheets. Tabs on this page are as follow-

- 1) **Delivery Summary** – Search Orders, Preview of trip sheets
- 2) **Quick Trip Sheet** – Create a trip sheet in quick way (multiple orders can be added at once)
- 3) **Remove From Trip Sheet** – Remove Orders from existing trip sheet
- 4) **Add To Trip Sheet** – Add orders to existing trip sheet
- 5) **Trip Sheet Messages** – Add/Edit/Delete messages for a trip sheet.

A detailed description of each tab is described below.

Delivery Summary Tab

This tab allows you to create a new trip sheet and preview already generated trip sheets. Here you can search orders with several available filters to manage and check the delivery status of an order.

Search Filters Available-

Delivery Date From- Orders delivery start date. It will list all orders having a delivery date greater than or equal to this date.

Delivery Date To— Orders delivery end date. It will list all orders having delivery date until this date.

Order Location – Orders having same order location will appear in search list (for multi store users)

Zone – Orders having same the same shipping zone will appear in search list.

Order Type – a) **ALL** – Both orders (added in trip sheets and not added on trip sheets) will appear in the search list.

b) **Routed Orders** – Orders added on trip sheets will appear in search list.

c) **Non Routed Orders** – Orders, not added on any trip sheets will appear in search list.

To generate a new trip sheet, you would click on **Generate Trip Sheet** button. This will open a new page (older method) named **Trip Sheet Generator**. Here you can enter orders manually (one by one) and generate a trip sheet. To follow the new way (faster way) to generate trip sheet, you should read and use the **Quick Trip Sheet** tab.

Quick Trip Sheet Tab

This is a new way and faster way to generate trip sheets. You can select multiple orders at once rather entering and adding orders one by one. .

This tab also allows search filters (dates, order location, zone) to search more specific orders. Default search is available with current date and logged in location.

When you will click on **Quick Trip Sheet** tab, the screen will look like as follows:

The screenshot shows the 'Delivery Manager' interface with the 'Quick Trip Sheet' tab selected. The interface includes a search section with the following fields and controls:

- Search Orders** section:
- Delivery Date Range** [MM/DD/YYYY Format]:
- From Date**: 10/23/2013
- To Date**: 10/23/2013

- Trip ID**: 1151 (text input)
- Driver**: -Select- (dropdown menu)
- Vehicle ID**: -Select- (dropdown menu)
- Mileage**: (text input)
- Generate Trip Sheet** button

Search Filters Available-

Delivery Date From- Orders delivery start date. It will list all orders having delivery date greater than or equal to this date.

Delivery Date To— Orders delivery end date. It will list all orders having delivery date till this date.

Order Location – Orders having same order location will appear in search list

Zone – Orders having same Shipping Zone will appear in search list.

Other Fields Descriptions-

Trip ID – New (auto generated) Trip Sheet ID. Not editable.

Driver – This will show you a list of all drivers available.

Vehicle ID – This will list you a list of all available vehicles.

Mileage – You can enter the mileage here. (optional)

ADDING ORDERS TO CREATE A NEW TRIP SHEET

By default today's orders will show up in the list. Both type of orders (added and not added in any trip sheet) will appear on this list. But you would be able to select only orders those have not been added to any trip sheet.

Orders (having trip sheet ID's) are shown here only for your reference.

So when you would search orders based on search criteria available, you will see the screen below:

4	<input type="checkbox"/>	6821			Test		Los Angeles	90004			click for map
5	<input type="checkbox"/>	6825			Mr. Imt Ahm				AM Delivery	Business	click for map

Here, you can see Order Number 6820 is associated with Trip ID 1137. So this order is not available to add to any new trip sheet.

This list also provide some features like-

- Order-** On clicking specific Order Number, you can directly view the Work Ticket.
- Trip ID-** On clicking specific Trip ID Number, you can directly open Trip Sheet preview.
- Address 1-** This provide a link to view the address in Google Maps
- Map** – This will also take you to the Google Maps

ADDING Orders to Trip Sheet: When you see the orders on the list, you can select orders by checkboxes and click on **Generate Trip Sheet** button. But you must specify a **Driver, Vehicle ID** before printing. If you don't the system will show a popup message saying to select/enter.

When adding orders you can also specify the **Sorting Order (stop number)** for driver routing in Sorting Order Column.. This will generate the trip sheet accordingly meaning smaller sorting order number will come first in the trip sheet preview. (Picture will be available at the end when you can view how trip sheet preview looks)

e.g. Orders #6807, #6811 are added to this trip sheet #1151 and clicked on **Generate Trip Sheet** button providing other Driver, Vehicle values. Grid will immediately be refreshed and you will see Trip ID is showing up now for these orders and new Trip ID (auto generated) has generated. (see picture below)
